SUMMARY

Hello ! I'm David, an enthusiastic student with a passion for web development, proficient in various programming languages and frameworks. I have a drive to bring creative and innovative solutions through technology. With my background in Computer Science, I aim to become a competent Fullstack Web Developer.

EXPERIENCE

MSIB Batch 6 By MIKTI

Golang Backend Developer Trainee

(February 2024 – June 2024)

- Had a good understanding of backend development with Golang and Echo, applying clean architecture and code principles.
- Developing robust and scalable backend systems, collaborating on writing maintainable and understandable code.
- Building efficient and secure REST APIs, and currently learning third-party service integration to enhance system performance

Gundarma I/O

Core Team (Academic)

(September 2023 - September 2024)

- Become a mentor to share knowledge related to Backend Development and Software Engineering.
- Work with a team to create a competitive programming event.

PROJECTS

- **TaskMinder**

A web-based task management application similar to Trello, built using Next.js.

- **KickStore**

A web-based e-commerce application for shoes, built using React, Express, PostgreSQL, and integrated with Midtrans as the payment gateway.

- **Gowork**

A web-based application that connects freelancers with clients, managed by an admin panel. Built using SQL and Laravel.

COURSE

NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno)

Udemy

- Getting Started With Node Js and Typescript
- Advanced Node Js Programming
- Building MVC applications.
- Creating RESTful APIs.
- Working with GraphQL for data querying.

React, NodeJS, Express & MongoDB The MERN FullstackGuide **Udemy**

- Comprehensive introduction to fullstack development with the MERN stack.
- Building dynamic user interfaces with React.
- Creating RESTful APIs with NodeJS and Express.
- Managing data with MongoDB.
- Integrating frontend and backend for a complete web application.

Belajar PHP Laravel 11: Bikin Web Platform Freelancer dan Klien **BuildWithAngga**

- Introduction to PHP and Laravel 11 fundamentals.
- Building user interfaces with the Blade Templating Engine.
- Creating authentication and authorization systems for users.
- Developing an admin dashboard for managing users and projects

AREA OF EXPERTISE

- | | |
|---|-------------------|
| ● Golang, Javascript, NodeJs, PHP, Dart | ● Git |
| ● SQL/Relational Database | ● Problem Solving |
| ● No SQL Database | ● Time Management |
| ● Docker | |

EDUCATION

Gunadarma University

(2021–2025)

S1 Sistem Informasi – IPK 3.73

Relevant Coursework : Algorithms, Basic Programming, Probability and Statistics, Big data, Data Mining, Database Relational, Machine Learning, Computer Security System, Website Development,
